Website for the hole story

DevOps

Fetching the dependencies

```
npm install -D babel-loader @babel/core @babel/preset-env webpack  
npm install --save-dev babel-plugin-transform-react-jsx npm install  
--save-dev webpack-cli
```

The I touched a .babelrc pointing to mithril as static vdom differ

```
{  
  "plugins": [  
    ["transform-react-jsx", {  
      "pragma": "m" // default pragma is mithril  
    }]  
  ]  
}
```

Building

Continuous build

npm start

Less -> CSS

make less
